ABOUT ME:

Full Stack Developer specializing in frontend development, with hands-on experience building modern and responsive web applications. Proficient in frontend technologies such as ReactJS, Vite, and TypeScript, with a strong focus on clean UI and user experience. Experienced in backend development using Laravel, Node.js, and Express, along with database management using MySQL and PostgreSQL. Skilled in developing RESTful APIs, integrating full-stack systems, and delivering end-to-end solutions.

WORK EXPERIENCE:

Fullstack Developer intern | January 2026- April 2026

Shore360, inc.

- Refactored legacy codebases to improve maintainability, readability, and performance.
- Debugged issues and implemented feature enhancements for an internal intranet system.
- Collaborated within an active development workflow, following coding standards and best practices.
- Applied software architecture principles and optimization techniques in multiple full-stack development projects.
- Gained hands-on experience in modern web development through mentorship and real-world project contributions.
